

PELENA-AS

THE ANTENNA SYSTEM IS CONCEALED IN THE EQUIPPED VEHICLE BOX

BASIC FEATURES

- The product is an antenna system installed in the equipped vehicle box to be mounted on the vehicle roof

- The multi-purpose box can be mounted on standard fasteners of various vehicles

- The product is free from unmasking signs

- The equipped box protects the antenna system from external exposures and mechanical impacts

- Installing the box on the vehicle roof is as easy as that of a commercial trunk

- The product can be delivered with pre-assembled antennas and additional transmitters and as an individual item that can be equipped with previously purchased antenna system

The supply kit depends on the specific features of application and a connected product by KOBRA JFC.

Maximum number of places for antenna installation: 13.
Max weight: 35 kg
